PROFILE

Architect and designer with a master's degree in Technology Innovation Management and five years of experience in product, service and communication design, three of them in city and national public-sector entities. I turn scattered information into systems people can actually use: tracking dashboards, prototypes, methodologies and communication pieces that help technical teams, executives and communities understand their projects and decide with evidence. I work from user research through delivery, combining service design, UX/UI, data visualization and automation.

Tracking & data

Indicator systems, dashboards and automated reporting for government targets and project portfolios.

User experience

User research, information architecture, prototyping and validation of digital products and services.

Communication & innovation

Visual identity, storytelling, workshop facilitation and advisory on innovation processes in the public sector.

EXPERIENCE

Design, Architecture and Digital Innovation Professional | RenoBo (Bogotá's urban renewal and development company)

March 2024 – August 2026 · Bogotá, Colombia

- Built and ran the tracking system of the Project Execution Division for an urban renewal portfolio exceeding COP 1.3 trillion (about USD 320 million): indicator matrix, statuses and alerts, with weekly reports automated in Google Apps Script.
- Designed dashboards and infographics in Power BI and Looker Studio that feed the monitoring committees and the reporting of government targets and management agreements.
- Prototyped in Figma a works-tracking tool with a timeline and georeferenced map, validated with technical teams over several iterations.
- Facilitated participatory design workshops to surface project needs, led the update of the entity's visual system and created the division's digital library of technical manuals and documents.

Graphic and Experience Designer | Agencia de Renovación del Territorio (ART), national territorial renewal agency

August 2023 – March 2025 · Bogotá, Colombia

- Designed the visual communication of the PDET territorial development programs (graphic identity, illustration, digital and print content, Central PDET portal) for Indigenous, Afro-Colombian and rural communities, institutions and partners.
- Represented the agency at COP16 with the Casa Pacífica experience and at two National Infrastructure Congresses supported by USAID, promoting the Works for Taxes mechanism.

Co-founder and Graphic Designer | Modulando Colectivo

May 2021 – March 2024 · Bogotá, Colombia

- Developed the brand's visual identity and led the concept and production of events, stands and engagement spaces with institutional actors and partners.

Graphic Designer and Architect | La Cumbre Constructores

January – March 2023 · Bogotá, Colombia

- Translated real estate project goals into graphic identities, architectural visualization and experiences for sales rooms and digital channels.

Creative Director | Fundación Artetra / MinTIC

July – November 2022 · Colombia

- Led end to end the UX/UI design, identity and information architecture of a web platform funded by Crea Digital (Colombia's ICT and Culture ministries) for women entrepreneurs in southern Colombia.

EDUCATION

Master's in Technology Innovation Management | Universidad de los Andes · 2026

Thesis on knowledge transfer and design innovation in RenoBo's urban projects.

Bachelor of Architecture (2022) and Bachelor of Design (2021), dual degree | Universidad de los Andes

Publication: peer-reviewed article in the indexed journal *Arte, Individuo y Sociedad* (2024).
